TechSourcing incorporates our best shore models to provide a flexible, cost saving solution for your IT needs. TechSourcing proved to be a deciding factor in providing a cost and quality edge in a competitive and global market. Successful companies are increasingly focusing attention and resources on their core competencies and outsource functions that are not considered core to their business.

Benefits

Cost Effective Model

- Maximize your contribution to the bottom-line through cost-effective technology solutions using Inteq's TechSourcing delivery model
- Convert your fixed costs into variable costs using flexible contracts
- Focus on core competencies, freeing resources from day-to-day operational activities

A typical cost saving illustration: Savings as high as US $ 750,000 could be realized over a one year period for a 25 resource project outsourced to Inteq, India and implemented in the US. Leveraging the TechSourcing advantage, our clients accomplish 30% to 50% cost reduction that adds up directly to the bottom-line.

Technology Obsolescence - Not a Worry Anymore

- Gain access to latest and emerging technologies without major investments in training and upgrading of system resources
- Respond faster to business changes
- Reduce the time for implementation

Enhanced and Definitive Operational Service Level

- Leverage Inteq's proven development process, disciplined quality systems and methodologies to improve service levels

Improved User Satisfaction

- Improved software functionality, and quality software will ensure higher user satisfaction

Access to Diverse Pool of Expertise

- With a pool of highly skilled professionals, Inteq is in a position to understand and cater to the specific needs of the enterprise. Further, a well-defined career growth path for the enterprise's in-house IT employees reduces the problem of manpower attrition
